

THE COLLECTION

The Gabel Stride Summer 06 collection is specially designed to fully support this new and exciting fitness concept. High performance poles have been developed for different target groups by the Gabel R&D Team in co-operation with International Fitness Experts and Sport Associations, with the support of the Sport University of Turin.

Every product has been developed with reliability and user's comfort in mind, being able to satisfy the needs of the most demanding users.

Versatility of the wide accessories range, perfect balance between lightness and strength of materials and an absolutely energetic design, allow Gabel Stride Poles to be on top of several product-testing charts. Apart from good products the benefits of the Stride Walk-Fit concept will only appear when using the proper technique.

In order to support our world-wide distribution network with a proper education program for customers, Gabel actively co-operates with the International Stride Association, ISA and other trendsetting Nordic Fitness associations, like the Nordic Fitness Institute Benelux (NFIB). These associations consist out of qualified teams of Nordic Walking and Stride Walk-Fit Master Trainers, who are supporting the Stride Walk-Fit concept world-wide through seminars, events and promo activities.
